Detailed Report:

The event started with the President of Jadavpur University IIC, Dr. Rajib Bandhopadhyay welcoming the seniors members of CII and talking about the importance of strong relationships between current and future industry professionals for a smooth transition in their careers. This was followed by brief interactive speeches by various members of CII, including the chairman of the organization currently posted in Tata Steel guiding students regarding a career in the industrial sector and how they could begin startups in the sector without funding while scaling with time.

Post this, a number of startup founders and researchers from the university presented their ideas, stories, and current state of operations in front of all the attendees. This not only motivated the crowd to work on their own ideas, but the founders also recieved on-spot guidance and Mentorship from the industry leaders present.

The Session was attended by students from UG, PG, and PhD levels along with faculty members. The Session ended with vote of thanks a brief networking round.
