### **Detailed Report:**

The Session began with the speakers presenting a comprehensive PowerPoint presentation that briefly summarized the purpose, past accomplishments and key activities of the Entrepreneurship cell and Institute's Innovation Council. A brief round of introductions were taken from all the participants and they were asked what they understood by Entrepreneurship or their perspective on it. The speakers began by explaining what entrepreneurship means and then eventually dove deep into its fundamentals.

The different wings of the E-cell were introduced and noted alumni that have gone on to build businesses were also talked about. To increase student interaction, freshers were asked about any innovative ideas they might have had in the past or sectors they were interested in. People were asked what their favourite startup was and why did they choose it.

The Session ended with a round of Q&A. Lastly, students were informed as to how they could join the University's E-cell, participate in Innovative Session/activities, and seek help from IIC in their entrepreneurial journey.
