Detailed Report:

The Session began with the speakers presenting a comprehensive PowerPoint presentation that briefly summarized the purpose, past accomplishments and key activities of the Entrepreneurship cell and Institute's Innovation Council. They began by explaining what entrepreneurship is and then eventually dove deep into its fundamentals. Senior professors from the department and IIC also attended the session while providing anecdotes of the past startup founders from the department.

The different wings of the E-cell were introduced and noted alumni that have gone on to build businesses were also talked about. To increase student interaction, freshers were asked about any innovative ideas they might have had in the past or sectors they were interested in. Some startup-centric quizzes were also included to familiarize people with how important startups are in their day-to-day lives.

The Session ended with a round of Q&A. Lastly, students were informed as to how they could join the University's E-cell, participate in Innovative Session/activities, and seek help from IIC in their entrepreneurial journey.
