## Detailed Report:

JU's E-cell and IIC participated in the Science exhibition which was organised as part of the Science Congress. The event was spread over two days – February 28 and March 1, 2023. The participants displayed the various innovative products that they have developed over the past few years. As part of the display, they demonstrated the working of the various products to school students as well as other attendees from various institutes and organisations. The participants received an overall good feedback from the various attendees.
